Aesculap Ball Snap System on Spreader and Blades

Advantages:

- Blades are safely locked without additional fixation, preventing them from detaching when the instrument is passed to the surgeon. In addition, the smooth surface minimizes the risk of catching a suture.
- Blades can be quickly exchanged during the operation.
- Different retractor patterns can be combined and exchanged at random, which allows for optimum selection of the blade size according to surgical needs.

■ Complete retraction system consisting of a retractor body, various blade configurations, and storage tray. Designed to enable less invasive spine procedures such as discectomies and decompressions.
 ■ Unique organization system enables easy storage and retrieval of desired blade. ■ Sturdy design provides rigid retraction even at large opening widths. All retractor components are titanium. Blade designs improve visualization and intra-operative imaging. For more information see our brochure number **PMSDOC658**.
